Controled logging

Graffiti protector

Inclusive Product

Hard wood

Regulations and certifications:

ISO 9001 ISO 50001 ISO 14001 ISO 45001

NEOBARCINO designer Bench , total dimensions (length x height x depth) 1800x835x710 mm, made with cast aluminum legs and seven natural tropical wood planks (treated with a triple-layer Lignus coating, a fungicidal, insecticidal, and water-repellent protector). Stainless steel hardware. Prepared for anchoring with M10 expansion bolts depending on the surface and project.
Optional not included: Customizable marking with 74x35 mm aluminum plate or milled board.

Materials & Finishes:

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.

High-quality aluminium: structural alloy resistant to corrosion, ideal for outdoor applications. Manufactured through extrusion and subsequently treated with a polyester powder coating, applied in an 80-micron layer, providing high resistance to weathering, UV rays and chemical agents. The surface ensures optimal coating adhesion and long-term durability in urban, coastal and industrial environments.

GRAFUS anti-graffiti protection (optional): Material protector against paints and markings that not only protects urban furniture but also restores its initial appearance, enhancing and facilitating cleaning. Meets cleaning requirements according to ASTM D6578. Withstands multiple cleaning cycles. Excellent chemical resistance (solvents, acids, bases), scratch resistance, and yellowing resistance. Strong adhesion on various paint substrates.
