Precast Concrete

Low maintenance

Regulations and certifications:

ISO 9001 ISO 50001 ISO 14001 ISO 45001

PETRUS designer Planter , total dimensions (width x depth x height) 1140x1140x510 mm, made of concrete. Its polygonal design takes the shape of an irregular polyhedron to create an element that presents an interesting interplay of light and shadow between its faces. Due to its size, robustness, and weight, it is an ideal product for delimiting pedestrian areas, ensuring maximum safety and promoting the renaturalization of the urban environment.
Supported on a prepared surface, by its own weight.

Materials & Finishes:

Concrete: Reinforced concrete with a pickled and water-repellent finish. Manufactured with cement, sand, and gravel embedded within a metal structure. Shot blasting results in a high-quality, durable texture.
