Table measuring 1.8m, made of tropical wood and painted steel
Table 1.8m with 2 structures and two braces. Steel structure with FERRUS hammered grey treatment. Tabletop made of 8 solid tropical wood slats, 100x30mm in section, FSC certified, 100% protected with LIGNUS and GRAFUS treatment (anti-graffiti treatment for wood surfaces). Fixing to the ground by means of four Ø10mm bolts.

Materials & Finishes:

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.
