

UM350

Bench

Nordico

Treated pine wood | M10 bolts fixing | Low maintenance

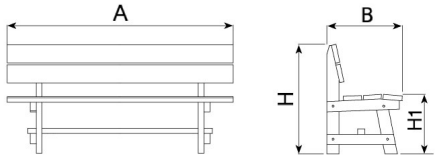

Regulations and certifications:

ISO 9001 | ISO 50001 | ISO 14001 | ISO 45001

Nordic Bench , overall dimensions (length x height x depth) 1940x840x560 mm, made of pine wood (treated in a vacuum-pressure autoclave, class 4, against woodworm, termites, and insects). Stainless steel screws. Prepared for anchoring with M10 expansion bolts depending on the surface and project.
Optional not included: Customizable marking with 74x35 mm aluminum plate.

Materials & Finishes:

Pressure-treated pine wood, risk factor IV, ensuring its durability outdoors for a minimum period of 10 years. Under weather conditions, treated wood develops a warm honey-brown color that eventually turns into a natural silver-gray. If exposed to variable weather conditions, this type of pine wood may develop some surface cracks that do not diminish its durability in any way. Regarding resin and knots, it's important to note that these are part of its natural appearance.
