

UM3D54

Chair

ARNE

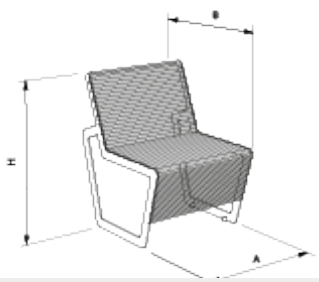

M10 bolts fixing

RAL7006 Colour

Regulations and certifications:

ISO 9001 ISO 50001 ISO 14001 ISO 45001

Designer chair with a steel frame (treated with the Ferrus triple-layer protective process for iron, guaranteeing optimal corrosion resistance) in a RAL 7006 finish. The seat and backrest are constructed using linear metal elements welded to the supporting structure, creating a resistant, stable surface suitable for intensive use. The design promotes water drainage and rapid drying, optimizing its performance in outdoor installations.

Chair **ARNE** UM3D54

Materials & Finishes:

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
